PROFILE

I am a B. Tech (Computer Science and Engineering) student pursuing his dream of becoming a developer with a passion to learn new skills and eager to work in an environment that can develop my skills more to new heights. I'm open to opportunities that knock on my door and willing to create the same. I believe in a cohesive work environment and I am sure I can be an asset to the team.

PROJECTS

PORTFOLIO

A portfolio created through HTML, CSS and Javascript

- Developed a responsive personal portfolio website using HTML5, CSS3, and vanilla JavaScript, showcasing projects, skills, and contact information in an intuitive layout.
- Implemented interactive UI features such as smooth scrolling, dynamic modals, and animated transitions to enhance user engagement and visual appeal.

DoomxStein

A 3D First Person Shooter game made through Python.

- Designed and developed a 3D first-person shooter game using Python, implementing core mechanics like player movement, enemy AI, collision detection, and raycasting-based rendering.
- Built a custom game engine framework from scratch in Python, focusing on performance optimization, immersive gameplay, and retro-style graphics inspired by classic Doom-like environments.

Dimensional Space

A 3D environment playable website to connect users around the world created through React JS.

- Developed an immersive VR-enabled 3D web application using the MERN stack, integrating Three.js for real-time rendering and WebXR to allow users to explore an interactive dimensional world directly through their browsers.
